EXPERIENCE

Managing Partner

Creative Glu

May 2026 - Present | Part time | Remote

AI Transformation

- Lead an offshore engineering team and guide engineering leads across a large client organization; set priorities and delivery plans from client needs.
- Guided a client's mobile app rebuild using Expo and React Native. Modernized backend infrastructure with Kubernetes clusters, CI/CD, and SDLC practices for 24/7 operations.
- Built an internal intelligence platform connecting 150+ databases so teams could analyze information across previously separate systems.
- Added AI-powered querying that delivers answers in seconds instead of weeks or months, and built an AI-based report generation system.
- Introduced AI-assisted development to engineering teams and helped skeptical engineers adopt the tools in their daily work.

Co-Founder & CEO

Pencil Ink

July 2023 - Present | Remote

Currently a part-time side venture, maintained outside business hours

- Bootstrapped a product and project management SaaS platform from concept to alpha with paying customers.
- Defined product direction, pricing, go-to-market strategy, and early sales efforts.

CEO / Startup Operator

IPC - Interplanetary Consensus

May 2025 - April 2026 | Remote

- Led product, technical, and ecosystem strategy for a blockchain scaling and consensus protocol in the Protocol Labs / Filecoin ecosystem.
- Directed the technical roadmap, go-to-market efforts, and developer ecosystem growth for the IPC Core Cell.
- Operated as a grant-funded Startup Operator under the Open Impact Foundation.

Contractor - Scaling & Infrastructure Automation

DIMO

October 2023 - May 2025 | Remote

- Designed and built DIMO Node using Go and Pulumi to automate deployment orchestration, upgrades, and node management.
- Improved local developer environments and enabled partners and community members to deploy and operate their own nodes.

SUMMARY

Engineering leader with 20+ years in software and infrastructure. Manage client engineering teams and build AI tools at Creative Glu. Published iOS apps and built Android apps, alongside mobile-first web applications. Former CTO at Proof and Storj.

MOBILE APPS

Published iOS apps and Android development

MacroTracker by Reciplan

iOS | AI-powered nutrition tracking

Built a nutrition and weight-trend app with offline-first logging, barcode scanning, and AI-assisted meal estimates from photos, text, and voice.

App Store

NeighborLink

iOS | React Native | Next.js

Built a community management platform with mobile and web experiences for announcements, discussions, events, documents, and resident coordination.

App Store | Website

Paper Games Retro

iOS | Offline mobile games

Built and published an offline game collection with computer opponents, local multiplayer, and in-app purchases.

App Store

Android Productivity App

Android | Unpublished

Built a todo and productivity application for Android, alongside other independent Android apps.

MOBILE FIRST WEB

ReciPlan

Mobile-first meal planning web application

Designed, built, and deployed a meal planning web application as a solo full-stack project.

reciplan.pro

EXPERIENCE

Chief Technology Officer
Proof
April 2022 - July 2023 | Remote / Miami, FL

- Led engineering teams in re-architecting the Proof Impact Platform for product fit, extensibility, and scale.
- Improved engineering efficiency by 25-35%; reduced development environment issues from 30-40% to under 5%.
- Saved approximately $360K-$600K annually by avoiding the need for 4-5 additional hires.

Decentralization Workstream Lead
Gitcoin DAO
May 2021 - March 2022 | Remote

- Launched the token and helped establish the founding Gitcoin DAO workstreams.
- Architected decentralized versions of core products; built and led the team and established operations and policies.

Vice President of Engineering and Product
Gravy Solutions
June 2020 - May 2021 | Remote / Atlanta, GA

- Increased profit margins by more than 70% by architecting and building an application that reduced manual work and required support.
- Independently developed the proof of concept and recruited the engineering team to scale it to production.

Chief Technology Officer | **DFM Data Corp., Inc.**
March 2020 - June 2020 | Contract | Atlanta, GA

Chief Technology Officer / Principal DevOps Architect
Storj Labs, Inc.
March 2016 - December 2019 | Atlanta, GA / Remote

- Joined as the third employee, became CTO in July 2017, and helped grow the company from 5 to 50+ employees; led development, product management, QA, UX, and DevOps.
- Launched decentralized cloud storage with benchmarks exceeding AWS and GCP; served as Member and Secretary of the Board of Directors.
- Contributed to development of Storj's mobile app.
- Led an in-house token sale, distribution, and conversion that raised $30M with zero security incidents.

Site Reliability Engineer
Yik Yak
October 2015 - March 2016 | Atlanta, GA

- Migrated infrastructure supporting the geo-fenced social mobile app to Docker and Kubernetes, reducing deployment times by 90%.

Director of DevOps
BitPay
September 2014 - November 2015 | Atlanta, GA

- Owned infrastructure security protecting millions in cryptocurrency assets; resolved throughput bottlenecks and built deployment automation to improve reliability and delivery.

Senior Release Engineer | **DealerMatch**
October 2013 - September 2014 | Atlanta, GA

Systems Engineer | **Turner Broadcasting**
March 2005 - October 2013 | Atlanta, GA

TECHNICAL SKILLS

Mobile and Web

Expo, React Native, Next.js, TypeScript, JavaScript, Android app development, iOS App Store releases, mobile-first web interfaces, server-side rendering (SSR)

Additional Experience

Limited project experience: Swift, GraphQL, JVM-based systems

AI and Automation

Claude, Claude Code, Codex, Grok, LLM integration, AI-assisted development, automated reporting

Backend Development

Node.js, Go, Python, distributed systems

Cloud and Delivery

AWS, GCP, Kubernetes, Docker, Terraform, Pulumi, CI/CD, Linux

Engineering Leadership

Engineering team management, offshore delivery, technical roadmaps, AI adoption, Agile delivery, developer environments

Reliability and Security

Infrastructure security, deployment automation, production operations

EDUCATION

Southern Polytechnic State University

Computer Science studies | 2001-2002

ADVISORY ROLES

Storj Labs | Board of Advisors
Verady | Board of Advisors
